Auckland, Grafton 1010

EDUCATION

University of Auckland Auckland, NZ•Expected in 06/2026
*Bachelor of Science:*Computer Science

SKILLS

- Teamwork and collaboration
- Problem-solving
- Friendly, positive attitude
- Object-oriented programming
- Web app development
- API design and integration
- Database management systems
- Programming languages

CERTIFICATIONS

Microsoft Azure Fundamentals
AZ-900

PROFESSIONAL SUMMARY

Software Development Intern with hands-on experience in Java and Spring Framework, and strong full-stack capabilities in C#, React, and .NET. Completed a backend-focused internship at ShenZhen Shentai Chuangjian Technology Co., Ltd, where I contributed to RESTful API development, system integration, and code optimization through agile team collaboration and structured reviews. Also independently developing an AI-powered survey analysis platform using .NET, React, and OpenAI API, focused on scalable architecture and enhanced user experience. Currently studying at the University of Auckland and passionate about building reliable, intelligent software solutions.

EXPERIENCE

ShenZhen Shentai Chuangjian Technology Co., Ltd - Software Development Intern
Shenzhen, China•12/2024 - 01/2025

- Developed and maintained Java-based backend services using the Spring Framework, enhancing business logic and system scalability.
- Implemented and tested RESTful APIs to enable efficient data exchange between client and server systems.
- Participated in daily agile team stand-ups and sprint planning, ensuring alignment across cross-functional development efforts.
- Assisted in debugging and resolving application issues, improving system stability and reducing production bugs.
- Integrated backend systems with MySQL databases and third-party services, ensuring secure and seamless data flow.

Personal Project - AI-Powered Survey Analysis Plat
Individual Project | Ongoing

- Designed and implemented full-stack survey system using C# (.NET) for backend and React for frontend, supporting dynamic form generation and user submissions.
- Integrated OpenAI API to enable automated natural language analysis of survey responses, generating real-time summaries and insights.
- Built RESTful APIs for data exchange between frontend and backend, ensuring secure and scalable communication.
- Designed and optimized SQL-based data models for efficient storage and retrieval of form, question, and answer records.

Course Project - Podcast Streaming Web App
Team Leader | Flask, HTML/CSS, Jinja2, SQLite

- Led a team of 3 to design and develop a web-based podcast streaming platform using Flask and Jinja2 templates.
- Coordinated project planning, task allocation, and Git-based collaboration to ensure timely and efficient delivery.
- Built backend logic for audio streaming, podcast categorization, and episode tracking using Flask and SQLite.
- Facilitated team code reviews and maintained technical documentation to support future enhancements.
